

## Spraywest advantages:

- High quality and professional service
- Competitive pricing
- Certified CUFCA Contractor  
(Canadian Urethane Foam Contractors Association)
- Licenced CUFCA Applicators
- Offers third party Quality Assurance Program
- Member of Regina Homebuilders' Association
- Year-round installations
- Locally owned and operated

*"You have our team's assurance  
of quality and service."*

**SPRAY**  **WEST**

Foam Insulation and Coatings

ZERO OZONE DEPLETION SUBSTANCE

RECYCLED PLASTICS, VEGETABLE OIL AND SOYA

MOLD & MILDEW RESISTANT

ECOLOGICAL INSULATION

LOWER UTILITY BILLS

HEALTHIER, CLEANER IN-HOME ENVIRONMENT

# Spraywest has set a new standard of quality.

In addition to using Polarfoam insulation which is made from recycled plastics, vegetable oil and soya, our detail-oriented team is professionally trained and fully certified.

## The Ideal Building Envelope System!

**POLARFOAM PF-7300-0 SOYA** is a system used to create a highly effective envelope which includes these essential elements in one application:

- High R value
- Air barrier
- Vapour barrier
- Seals out dust and pollen
- Rodent and moisture resistant
- Generates **energy efficiency**, thus lowering every month's utility bill
- Offers a controlled and comfortable living environment

Based in renewable natural resources, Polarfoam's polyurethane spray foam insulation applied by Spraywest creates more energy-efficient homes by expanding to seal cracks, gaps and voids in walls and ceilings. As a result, homebuilders, homeowners and business owners can use smaller, more energy-efficient heating and cooling units to achieve the same level of comfort.

Spraywest uses a soya-based foam called **Polarfoam PF-7300-0 SOYA**. Its formula reduces moisture intrusion and energy loss in homes. It tightly bonds with beams and surfaces in ceilings and walls to deliver an **air barrier** and **vapour barrier** that surpasses conventional insulation materials. By maximizing use of renewable materials and reducing energy consumption, Polarfoam makes a profound impact on the environment, supports green building and creates healthy living spaces.
